

Solve the following exercises:

Guide: for each question you have to code and display the result in your browser. Then upload your all codes to Github and share your github repository with me in the assignment solution channel.

- Create a webpage that prints your name to the screen.
- Create a webpage that prints the numbers 1 - 10 to the screen.
- Create a webpage and set its title to "This is a webpage".
- Create a webpage that prints the message "When was this webpage created? Check page's title for the answer." to the screen, and set the title of the page to the current date
- Create a webpage that prints any text of your choosing to the screen, do not include a head section in the code.
- Repeat exercise #5, but this time include a head section in the code.
- Print your name in green.
- Print the numbers 1 - 10, each number being a different color.
- Prints your name in a Tahoma font.
- Print a paragraph with 4 - 5 sentences. Each sentence should be a different font.
- Print a paragraph that is a description of a book, include the title of the book as well as its author. Names and titles should be underlined, adjectives should be italicized and bolded.
- Print your name to the screen with every letter being a different heading size.
- Print the squares of the numbers 1 - 20. Each number should be on a separate line, next to it the number 2 superscripted, an equal sign and the result. (Example: $10^2 = 100$)
- Prints 10 names with a line break between each name. The list should be alphabetized, and to do this place a subscripted number next to each name based on where it will go in the alphabetized list. (Example: Alan₁). Print first, the unalphabetized list with a subscript number next to each name, then the alphabetized list. Both lists should have an <h1> level heading
- Print two paragraphs that are both indented using the command.
- Print two lists with any information you want. One list should be an ordered list, the other list should be an unordered list.
- Prints an h1 level heading followed by a horizontal line whose width is 100%. Below the horizontal line print a paragraph relating to the text in the heading.
- Print some preformatted text of your choosing. (hint: use the <pre> tag)
- Print a long quote and a short quote. Cite the author of each quote.
- Print some deleted and inserted text of your choosing.
- Print a definition list with 5 items.
- Print two addresses in the same format used on the front of envelopes (senders address in top left corner, receivers address in the center).

- Print ten acronyms and abbreviations of your choosing, each separated by two lines. Specify the data that the abbreviations and acronyms represent.
